

Why?

Stores may close during a health crisis, like the pandemic flu, to reduce the spread of disease.

Prepare Year
www.emd.wa.gov/preparedness

how to → prepare

It's Easy!

**Store 2 cans of food per person per day.*
Prepare for at least 7 days.**

$$\frac{\text{people in household}}{\text{people in household}} \times \frac{2}{\text{cans / day}} \times \frac{7}{\text{days}} = \frac{\text{cans to buy}}{\text{cans to buy}}$$
